

19H08023Q0029 Dedicated Internet Service

Questions and Answers

1.- Section 3.) item 7, in case a new point of connection is required, how can we include the installation costs?

-IDIQ Contract, includes and considers installation services, a modification to the contract itself will not be executed, however a quote will be requested for the new point of connection once received, a task order will be issued to vendor awarded with a contract.

2. Are there any sort of terrestrial fiber already laid in at the new location? If so, what?

-There are 3 fiber lines for construction. None of them go thru the telecom demark room. All of them will be disconnected at the end of construction.

We will turn over empty duct backs to go from the poles to the demark room.

Winners will be responsible for installing all required cables from the demarcation point to their networks. The cabling from the demarcation point into the embassy's internal network is not the awardee's responsibility.
